

An ECOSOFTT Success Case: Xavier Institute of Development Action and Studies, India

Off-Grid Management Institute Campus Becomes Water Sustainable Through Cost Effective Means

Xavier Institute of Development Action and Studies is a leading educational institution in Central India focusing on management, rural development and sustainable development. It sits on a beautiful 12-acre campus in the city of Jabalpur and is totally dependent on groundwater.

Site Profile:

- No. of students & staff: 400
- Water consumption: 40,000 liters per day

ECOSOFTT Solutions:

- Total Water SMART Community solution based on Poseidon and Aerobic Biofilter Without Sludge Solutions in different parts of the campus

Customer Benefits:

- Water sustainability despite no access to municipal water and sewage systems
- Treated water used for landscaping to maintain the lush greenery and campus aesthetics
- Prevention of groundwater contamination by sewage
