

An ECOSOFTT Success Case: Coastes Group of Restaurants, Sentosa, Singapore

ECOSOFTT Supports Restaurant Chain in Water Conservation and Sustainability Performance Improvement

Situated along a golden stretch of Sentosa's Siloso Beach, Coastes group of 4 restaurants offer a rustic charm and casual laid-back beach vibe where the sunbeds and deck chairs flow right to the water's edge.

ECOSOFTT was engaged by Coastes to conduct a Water Audit. The scope included review of the water consumption in food preparation, dishwashing, cleaning, ice machines, toilets and patrons' usage related activities.

The project identified ways to reduce water consumption by over 10%, which represents a significant savings especially in view of the 30% increase in water tariffs in Singapore.
