

WATER INNOVATION & SUSTAINABLE ECONOMICS (WISE™)

ECOSOFTT is a Total Water Solutions provider of leading edge solutions for **Industrial, Commercial and Residential** facilities. Our innovations have been recognised at the highest international level including being the first ever Winner of the **globally-renowned Zayed Sustainability Prize – Water Category in 2019**.

Used Water to Fit for Purpose Reuse

ECOSOFTT's Water SMART Blue Buildings and Industries platform enable facility owners and managers to **Collect, Treat and Manage** water in an integrated manner using SMART techniques and technologies.

Innovative Solutions for:

Process Water

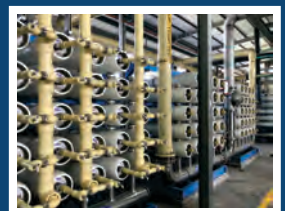

Cooling Tower Blowdown

Vehicle / Material Washing

Grey & Black Water

Rainwater & Backwash

	Service	Water Audit Water Balance Redesign	Feasibility Study SMART O&M
	Process & Technology	50-80-20 Zero Liquid Discharge	Fit for Purpose Water Net Zero Industry
	Economic Model	PUB & Govt Funding Asset Value Creation	Vendor & 3rd Party Financing
	Sustainability & Reporting	Water Efficient Building Watermark Award	ISO 24526 Sustainability Alignment

Over 50 Successful Projects with Proven Sustainability and Tangible Returns on Investment

Success Cases & Innovative Projects

Water SMART Blue Building in JTC Cleantech Park

- Recycled water suitable for toilet flushing, cooling towers and landscaping
- Operator-free through real-time information and automation

Zero Liquid Discharge for Chemicals Producer

- Wastewater contains high VOC, Oil & Grease, COD and TDS
- Recycling of water for cooling tower make-up and evaporation to eliminate effluent disposal

Used Water Recycling for Packaged Food Manufacturer

- Recycling of combined used water of production and domestic sewage
- Nutrients and biomass converted to fertilisers

Resource Recovery: Sludge to Energy in Ulu Pandan Water Reclamation Plant

- Sludge from used water treatment process to generate biogas
- Full automation to enable variable management
- Verstatile and designed for continuous innovation

Island Resort – Used Water Recovery For Reuse

- Zero discharge of sewage into the ocean
- Full recovery of used water for reuse
- Integration of rainwater to augment supply and reduce cost of desalination

Car & Coach Wash Used Water For Reuse & Compliance

- Fully automated and compact system that delivers water for reuse for car wash and general cleaning
- Meets discharge norms for compliance

Cluster Based Common Effluent Treatment System for Industrial Estate

- Robust system that reclaims all used process water from mixed users for reuse
- Low total operating cost

Water Smart Hospitals, Commercial Malls & Office Complexes

- Integrated water management reclaiming used water from the premises and augmenting supplies for a low water footprint
- Fully integrated with the façade and operations
- 100% reuse of fit for purpose water

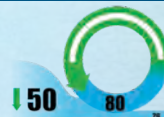

Water Audit & Efficiency Plan for Wildlife Reserves Singapore

- Comprehensive assessment of water usage in attractions and back of house
- Tangible actions to achieve short-term savings and long-term sustainability vision

Talk To Us About WISE™ & Your Sustainability Goals

- Reduce water footprint
- Reclaim and reuse water on premises
- Be sustainable & compliant
